Remembering Jeffrey Beaton

In 2021, Board Director and Hospital Trustee Jeff Beaton passed away and will be deeply missed by the Foundation and community. Jeff supported many of our fundraising events and was always warm and welcoming to all our staff and volunteers. Gifts were given in Jeff's honour to our 1907 Society Endowment, an investment made in perpetuity to further the impact of our most generous volunteers.

Yves Gadler
Chief Executive Officer,
Lakeridge Health Foundation

There's something very special about beating the odds. Whether it's a trauma patient in our Emergency Department, a premature baby in our Neonatal Intensive Care Unit or a family facing cancer, inspiration comes from every corner of our Hospitals.

Thanks to investments from donors like you, we're changing the way our care teams treat each patient. State-of-the-art technology is being introduced in every department, clinical spaces are expanding and innovative research and clinical trials are finding new ways of treating disease.

We write this message looking back on the last year feeling so encouraged that the Foundation didn't meet a challenge we couldn't overcome. After two years of the COVID-19 pandemic, the odds simply weren't always in our favour. Yet, during these difficult and unprecedented times we have been blown away by the generosity of our community in keeping health care a priority. Despite cancelling some of our events, postponing others and relying predominantly on digital communications, you have stayed by our side and continued to help us make an impact on the care at Lakeridge Health.

We ended 2021 celebrating our newly launched *Our Cancer Campaign* with over 60% of our \$20 million goal reached. This past year saw record fundraising numbers through our online personal fundraising pages – a unique and deeply personal resource of community members wanting to raise money in their own way. The new Interventional Radiology Suite opened with double the space and boundless impact for patients throughout the Hospital. We also received two significant donations from some of our wisest community members both focused on helping families in our Region and the staff that care for them.

These staff members, and those of our own at the Foundation, have persevered despite their personal challenges during COVID-19 to ensure the health and safety of our community. For our Foundation team, that meant thinking outside of the box of traditional fundraising and keeping connected with you through email, phone and even driveway visits. To all those at Lakeridge Health who have persisted – we are in awe.

Our 2021 year marked our best fundraising results in 15 years, an achievement simply not possible without you. Please take a moment to read through the inspiring stories of our past year and take note of the community members who have taken steps to support future generations of patients and families in Durham Region.

Oh behalf of our Board of Directors, volunteers, staff and physicians – thank you for making local health care your cause.

Recognizing the Incredible Staff of Lakeridge Health

Donors Give Thanks Through our Circle of Gratitude program.

Being in the Hospital can be scary and stressful. Whether it's your own experience or that of a loved one, it's the compassionate teams at Lakeridge Health that can make for a positive experience for everyone. Lakeridge Health Foundation's Circle of Gratitude (COG) program provides families and patients an opportunity to say thanks to those special individuals and teams in our Hospitals. This year, generous donors through the COG program donated more than ever before despite the ongoing pandemic.

One very special story came our way at the end of 2021 from David and the Ross family. In the fall of that year David's father had surgery to remove a significant tumour in his colon. Unfortunately, after returning home to recover, his father suddenly experienced complications related to an unknown issue with his lungs. Dad ended up in the Intensive Care Unit (ICU) at Northumberland and at 88 years old, he quickly developed pneumonia and was transferred to Lakeridge Health for specialized care.

"Ultimately, Dad passed away on my mom's birthday – October 12 – after being transferred back to Northumberland Hills Hospital. But not without the incredible efforts of many physicians and staff in the ICU," shares David. "We all felt Dad's care was top notch in every way by ALL of your staff and management at Lakeridge. Everyone excelled in their roles and clearly were working in Dad's best interests."

One particular staff member, however, really stood out to David and his family. "Ruth was a ray of sunshine

every time we saw her. She was caring, supportive and engaging with a twinkle in her eye. She joked with Dad, and came to understand his positive outlook on life. Ruth looked beyond her patient to the person who she cared for, and she clearly did care. She oozed humanity."

After David's father had spent well over 10 days in intensive care across two hospital sites, he was in desperate need of a shave. Ruth, a Registered Nurse in the ICU noticed and reached out to David to ask for a proper razor to help his father who had been clean shaven his whole life. "Ruth told me later, unabashedly, that Dad had not liked her shaving him, and that she had to quit half way through. She said that Dad joked that she was fired as his barber, but he would appreciate her staying as his nurse. It really endeared her to us and Dad."

When David's father was to be transferred back to Cobourg, Ruth called the family to say she had volunteered to go with him in the ambulance. "That brought a tear to my eye," remembers David. "Clearly, she truly did care for Dad, and that alone brought great comfort to us all. She also called me upon arrival at Northumberland to reassure that all had gone well on the trip and Dad was in good spirits."

Losing a parent is a devastating experience, but the Ross family look back on the experience with a grateful outlook. "While Dad did die in the end, I have to say that it is standout people who make the journey a little more bearable. Ruth was hands down one of those standout people!"

“Having a loved one in hospital isn’t always easy. Having a kind-hearted, talented care team, and standout people like Ruth makes the journey a little more bearable.”

– David Ross

Gratitude Spotlight

“He quite literally saved my life.”
A patient’s donation made
Dr. John Dickie, Chief of Surgery,
a second time COG recipient.

Dr. Julie Francis, Oncologist with the
R.S. McLaughlin Durham Regional
Cancer Centre with her patient Janis
who made a donation in recognition
of the “care and professionalism”
she experienced during her care.

Neonatal Intensive Care Unit staff
were recognized by a family to
celebrate their son’s first birthday,
and recognize the amazing care
the team provided a year ago.

Dr. Audrey Li hit a milestone as she
received her 16th recognition through
the program. To date, she is the most
frequently recognized individual across
all participating Lakeridge Health sites.

\$2 Million Legacy Set to Advance Cancer Care for Generations

Family of Carol Wonnacott shares that her wish was to always help those in her community.

Last year Lakeridge Health Foundation received the news that a very generous gift was to be made from the Estate of Carol Wonnacott, totaling \$2 million in support of cancer care.

The gift was in fact a long time coming. Set aside after moving on from the family's first farm many years ago, Carol's daughter Angela shares that her mom and grandparents wanted to ensure members of the Durham Region community had the best available health care, close to home.

Carol was born and raised in Whitby on a beef cattle farm. She loved animals, was an active 4-H Club member and had a passion for music. Her parents, Chester and Chrissy Lee, taught Carol to be the honest, respectful and caring person she was known to be by her family and friends.

Carol also taught music in Bowmanville and surrounding areas. "Mom was a strong and independent woman," remembers Angela. "She was always singing and playing piano in the house."

The family moved from Whitby to a farm in Bowmanville and Angela grew up helping her mom tend to their animals. She still lives on the property, now with her husband Brian, continuing her family's tradition in farming.

"We've always been very family oriented. Beyond that, Mom had a solid group of friends and never once missed a funeral or wedding."

When the COVID-19 pandemic began, Angela shares that it was very hard on her mom to be away from those close to her. In March of 2020, Carol experienced a stroke and passed away. While she never had cancer, Angela explains that her family knew so many people who did.

"Mom was very giving and kind," says Angela, sharing that her mom's legacy would follow suit. Carol's gift will have a significant impact on cancer patients throughout Durham Region, ensuring families continue to receive exceptional cancer care from one of Ontario's top cancer centres. Just as Carol would have wanted.

Leaving a bequest to Lakeridge Health Foundation is a personal and inspiring way to make a difference in your community beyond your lifetime. Our charitable giving experts are here to answer any questions you may have about how your legacy could impact generations to come. For more information, please connect with Christine Lukewich at clukewich@lh.ca or 905-576-8711 extension 33824.

Harry Peleshok was One in a Million

In September, 100-year-old lifetime resident of Oshawa Harry Peleshok donated \$1,000,000 to Lakeridge Health Foundation as part of his belated birthday celebrations! Harry was a member of the Air Force, a firefighter, a home builder, a grocery store owner and butcher. He later opened up his own dealership and became a successful car salesman. Married for 77 years to his late wife Audrey, Harry had three children, four grandchildren and three great-grandchildren. An active member of the Oshawa Golf Club since 1953 Harry could always be found playing a round with friends all season.

Sadly, Harry passed away on February 9, 2022. His legacy will be remembered through the impact of this incredible gift, which set up an endowment fund to support the needs of Lakeridge Health for at least another 100 years to come.

Maximize impact when you donate securities directly.

Harry's generous \$1,000,000 gift was made through a donation of stock to Lakeridge Health Foundation. Donating securities directly to Lakeridge Health Foundation eliminates the tax payable on any capital gains you will earn. This means you can support the future health care needs at our Whitby and Oshawa Hospitals while minimizing the cost of the donation to you. No matter the amount, donating stock, mutual fund shares or other securities to charity is an easy and impactful way of advancing health care in your community.

For more information, please connect with Steve MacDonald at stmacdonald@lh.ca or **905-576-8711** extension **34176**.

Giving Tuesday

Recognizing local champions for going above and beyond.

Giving Tuesday is a global initiative that takes place every year after Black Friday and Cyber Monday. It's a time when we can all join forces and support our favourite causes. In 2021, Lakeridge Health Foundation recognized the community members and hospital staff who are shining representatives of our most dedicated supporters.

The 2021 Hospital Champion Award recognized a group of inspired physicians who rallied together to create the Dr. Benjamin Fuller and Family Endowment Fund in Emergency Medicine to honour their colleague. Following this success, the team pushed on to raise their total to nearly \$62,000 to recognize another colleague, retiring Emergency Department veteran Dr. Rudy Vandersluis.

The Douglas Brothers were recognized for their perseverance and unique ideas during the darkest days of the COVID-19 pandemic. Kyle, Matt and Ryan were awarded the 2021 Community Champion Award. The family created an extremely successful 8-hour challenge event, Laps 4 Lakeridge Health, a daring winter bike ride that raised over \$22,000 for mental health.

The inaugural 2021 Youth in Philanthropy Award was created to recognize a child or youth who has stepped forward to support local health care. The first ever recipient was inspiring teenager Brooklyn Burger-Jacobs who raised over \$100,000 to establish the Kelly Burger Legacy Endowment Fund in honour of her late mom. Brooklyn's outstanding efforts and commitment to advancing cancer care are inspiring community members of all ages.

Community Giving

1 50/50 Raffle continues to draw winners

In 2021, the Foundation continued a successful 50/50 Raffle, while shifting its fundraising goals toward cancer care in Durham Region. Funds raised were split in half to ensure important updates could be made to equipment and capital needs. The warmer months brought larger jackpots – in June, the grand prize winner was awarded \$41,455!

2 Canoe Believe It?

In early 2021, James and Shawn Lant were searching for a way to honour their Dad, Richard, who was diagnosed with Melanoma in late 2020. The family learned it quickly developed to Stage 4 resulting in what would be a long and hard battle.

On July 30, 2021, the Lant brothers, along with two friends, canoed and portaged 171 kilometers, completing The Brent Run, an acclaimed trek through Algonquin Park in 59 hours. Along with this amazing achievement, they raised \$18,620 to support the R.S. McLaughlin Durham Regional Cancer Centre and those impacted by cancer, including their father.

3 Taking Cancer Care to New Heights

In the summer we met the amazing Sandra Jack who was diagnosed with breast cancer five years ago and started receiving care at the R.S. McLaughlin Durham Regional Cancer Centre. To celebrate her five-year milestone, Sandra decided to check an item off her bucket list, and use the opportunity to raise funding for the Cancer Centre that meant so much to her. Along with her friend Krista and Oncologist Dr. Leta Forbes, the group completed the CN Tower EdgeWalk on July 31, 2021, and raised over \$15,000 for the R.S. McLaughlin Durham Regional Cancer Centre.

“It’s only because of the excellent care and treatment I received at this amazing Cancer Centre that I am still alive today,” she said.

4 Teeing it Up for Cancer Care

After a year away from the greens, Lakeridge Health Foundation’s Golf Classic, presented by The Mackie Family, took place on August 17, 2021. Golfers were eager to fill up spots for the golf tournament at the prestigious King Valley Golf Club. With COVID-19 restrictions still in place, we were able to ensure that 120 golfers safely hit the links for cancer care.

The generosity of those golfers, and community sponsors, raised over \$164,000 in support of comprehensive cancer care at Lakeridge Health, funding services such as diagnostic imaging, surgery and laboratory. Thank you to our generous sponsors, community partners, volunteers and golfers for all of the effort they put into ensuring a safe event was in place to support exceptional health care, close to home.

Winning big while supporting local cancer care

Lakeridge Health News

Independent Expert Panel Recommends Whitby as Site for New Hospital

The Lakeridge Health Board of Trustees has received and accepted a recommendation from the Expert Panel that a site in Whitby should be protected for a proposed future hospital in Durham Region. The recommendation was provided to the Board following a phased process that included a comprehensive public consultation on the criteria used to score site proposals, a public Call for Proposals to interested landowners, and a rigorous evaluation and scoring process.

The independent Expert Panel's recommendation came after a scoring process of all sites, supported by a Fairness Advisor and Subject Matter Experts. The Panel recommended the Whitby site to the Board of Trustees described as 50 acres of land south of Highway 407, west of Highway 412, east of Lake Ridge Road and north of Highway 7/Winchester Road. The location is easily accessible due to its proximity to major existing highways and roadways, as well as planned public transit. Its location in central Durham Region will help to serve residents across the Region.

“A proposed future hospital in Durham Region will serve all the communities in Durham,” said Sharon Cochran, Chair, Lakeridge Health Board of Trustees. “We are pleased to accept the Expert Panel's recommendation regarding the Whitby site – this is an important step in advancing the development of a new hospital as envisioned in our Master Planning process.”

Lakeridge Health's Master Plan identifies capital investments needed to meet projected demand in Durham Region over the next 25 years, including the proposed new hospital. With this endorsement from the Board, Lakeridge Health will work with the Town of Whitby on the next steps in the process, as well as further consultations with community stakeholders. Simultaneously, Lakeridge Health will partner with the Ministry of Health to work through the multi-stage approval processes for a new hospital.

An Epic Transition

Last year, Lakeridge Health partnered with six hospital organizations, representing 14 hospitals in Central East Ontario, to introduce *Epic* – a new, digital clinical information system (CIS) that allows care teams at different sites to all have access to the same, real-time information about a patient. “Epic is a game changer for Central East Ontario,” said Dr. Ilan Lenga, Chief Information Officer and Chief Medical Information Officer at Lakeridge Health. “It will vastly improve the way we deliver care across Central East Ontario for generations to come.” The Epic system will have important implications for consistent, high-quality care no matter where a patient goes within the region.

The benefits of a singular, connected system were seen right away. In late in 2021, a patient in the Oshawa Critical Care Unit needed additional care at Scarborough Health Network (SHN). The Critical Care team quickly logged in to the Epic system to update the patient's information so it was immediately accessible by those transporting and accepting the patient at SHN.

Introducing **Our** Cancer Campaign

Because we can't fight the cancer battle on hope alone.

Cancer is one of the biggest and most life-altering foes our world and our community have ever faced – and we're facing it together. In October of 2021, Lakeridge Health Foundation launched *Our Cancer Campaign*, a \$20 million campaign to raise funds for research, education, capital projects and equipment that will advance cancer care across our hospital, our region and beyond. *Our Cancer Campaign* will invest in every facet of the cancer journey to ensure our community continues to receive the comprehensive care they need and deserve, today and for years to come.

To help Lakeridge Health stay abreast of innovations in cancer care technology and treatment, we have earmarked \$5 million of our campaign goal for planned gifts and endowments from individuals, groups and foundations looking to make an impact for future generations of patients and their families.

In the past year alone, approximately 7,000 new cancer patients have visited our hospital, earning Durham Region the unwelcome designation of having three per cent of Canada's cancer cases yet only one per cent of its population.

The numbers will continue to climb as our population grows and ages. Already one of the fastest growing metropolitan areas in Canada, Durham Region is expected to double in size in the next 20 years. Our community will also see a projected 58% increase in cancer cases, resulting in an unprecedented demand for cancer services.

Cancer is the #1 cause of death in Canada, but the good news is that it can be beaten. Lakeridge Health is diagnosing cancer earlier and helping people live longer thanks to incredible advances in cancer care. Discoveries in cancer genetics and advanced imaging mean doctors can stop some cancers before they even start.

State-of-the-art equipment and minimally-invasive surgery means patients can spend less time in hospital with fewer complications, so they can get back to their lives and families sooner. *Our Cancer Campaign* will equip our hospital for the Durham Region of tomorrow. By investing in advanced technologies, equipment and resources today, we'll continue to have what it takes to face cancer together. It's not your cancer. It's ours. Now more than ever is the time for our entire community to act.

Our Goal

\$20 Million

\$5 Million (Future Fund)

Endowment and Planned Giving
for the Future

\$15 Million

Immediate Capital, Equipment
and Research Priorities

When History Repeats Itself

In 1907, Adelaide McLaughlin rallied alongside a group of community volunteers to purchase the land that would become home to the Oshawa Hospital. With just \$1,000, boundless passion, determination and the belief that health is everyone's responsibility, they started a movement that lives on today in the spirit and generosity of the entire Durham Region community.

One hundred years later, Lakeridge Health opened the doors to the R.S. McLaughlin Durham Regional Cancer Centre.

Named in honour of Adelaide's husband, the Cancer Centre was made possible with a remarkable \$42.5 million in community support during the *Heroes of Hope Campaign* between 2001–2007. Today, the R.S. McLaughlin Durham Regional Cancer Centre is one of the top cancer centres in Ontario. We provide a full range of cancer care, from prevention and screening, to diagnosis, treatment and psychosocial care, to nearly 18,000 community members a year, resulting in over 124,500 visits annually.

Every time someone in our community hears the words, "you have cancer," they know they have the backing of generations of Durham Region residents and supporters who understand that cancer doesn't just affect individuals. Cancer changes families and it impacts entire communities. Thanks to the support of donors like you, we exceeded our goals before and with your continued help, we will again. That's the kind of community we are and always have been.

“When examining a tissue sample for signs of cancer, we know how much of an impact our findings will have. It’s something we take seriously because we know how grave the result can be. Every sample that comes to our lab is connected to not just a person, but an entire circle of family and friends.”

— **Dr. Nadia Ismiil**, Chief and Medical Director, Laboratory Medicine Program

Advancing Cancer Care With Your Help

Cancer is a formidable enemy and it simply won't bend under the efforts of a few. If we want to beat cancer we have to back up hope – with action. And if we're serious about doing something about this disease, then we need to be all in. That's why *Our Cancer Campaign* is backed by a 34-person Campaign Cabinet, made up of the most dedicated community and medical leaders in Durham Region.

Since the launch of *Our Cancer Campaign*, countless individual donors, corporations and community groups have come together and helped reach over 60% of the \$20 million goal. But we still have a ways to go.

Paul Mackie Sr. of The Mackie Group and Mackie Real Estate is one of four Campaign Co-Chairs at the helm of the Cabinet.

"Lakeridge Health saved my life more than once – as a child and again recently as a cancer patient. I have a deep personal connection to this Hospital. Like others, my cancer diagnosis had an effect on my entire family. It wasn't about just me, but how cancer was going to change the course of our lives," says Paul. "Hope was a powerful thing for us, but you learn quickly that hope alone can't fight cancer. Hospital experts rely on technology and research funded by donors in the community to diagnose and treat this disease. When you realize no one can escape cancer it comes as no surprise why cancer should be our cause. On behalf of my fellow Cabinet members I want to continue to challenge the community – every person, business, community group and team – to help us save lives and join forces against cancer."

To learn more and follow along with the impact of *Our Cancer Campaign* please visit www.ourcancer.ca

**Over 60% Achieved
and Counting**

Our Priorities

After a rigorous consultation process with our Hospital partners, the Foundation aligned *Our Cancer Campaign* with six key areas of cancer care at Lakeridge Health. Ensuring every step in the cancer care journey receives financial support including the future needs of our patients, funds raised through the campaign are being directed in the following categories:

\$1.6 million

Diagnostic and Medical Imaging

\$4.1 million

Surgical Oncology

\$1.3 million

Laboratory and Pathology

\$2.8 million

Treatment and Technology

\$5.2 million

Research and Innovation

We're Pumped!

Smart IV Pump Campaign Closes with 200 New Machines Funded

In 2018, our Foundation announced the need to fund 200 Smart IV Pumps for the Oshawa and Whitby Hospitals. These new and improved pumps are mini-computers that support the administration of IV medication to a patient in our care. The technology ensures medication doses match up with patient information while at the same time housing online drug libraries to ensure accuracy.

At \$5,000 each, we asked donors to help raise \$1 million so that departments at our Oshawa and Whitby Hospitals could benefit from the mass Hospital-wide upgrade. Smart IV Pumps are used in nearly every department of the Hospital including the Neonatal Intensive Care Unit, surgery, chemotherapy suites, and of course the Intensive Care Unit (ICU) where many COVID-19 patients have been receiving care for extended periods of time.

Thanks to the generosity of many donors, community groups and local organizations, we are thrilled to share that all 200 Smart IV Pumps have been funded and replaced in our Oshawa and Whitby Hospitals.

The following list highlights donors who gave \$5,000 and up in support of this important campaign.

Introducing the New Interventional Radiology Suite

Much-Anticipated Renovation Now Complete and Open to Patients

The summer months marked an exciting time for Lakeridge Health and its Interventional Radiology team. Complex renovations and rigorous planning resulted in an impressive new department area – one of the most innovative at Lakeridge Health's Oshawa site.

The redeveloped Interventional Radiology (IR) suite offers Durham Region residents an improved patient experience and increased access to life-saving interventions that treat a number of diseases and health conditions, such as cancer, kidney disease, women's health issues, and cardiovascular conditions.

The former IR space, which was located in the Diagnostic Imaging area of the Oshawa Hospital, did not have a dedicated pre- and post-procedure area for consultations, preparation, and recovery. It also housed older equipment in some of the smallest rooms of their kind in the country.

The extensive redevelopment project resulted in a department two times its original size, increased safety for staff, and allowed for technologically advanced 3-D imaging equipment so staff can perform much more complex procedures.

"The new IR design is a remarkable investment that will advance the Diagnostic Imaging program at Lakeridge Health and our goal to provide high-quality, safe, efficient, and effective patient care," said Ron Burke, Director of Diagnostic Imaging, Lakeridge Health. "Our team is thrilled to work in this newly renovated and relocated space."

By moving out of the former Diagnostic Imaging area, the IR renovation has made room for a complete revitalization of the Ultrasound department in the Oshawa Hospital that will ultimately include seven private rooms and upgraded space for staff to offer consults and review scans.

The project was made possible thanks to \$5 million in donor support from the community to the Foundation's iSupport Campaign between 2015–2017 with key commitments from The Auxiliary of Lakeridge Health Oshawa and a collective of car dealerships in Durham Region. Aside from the new procedure rooms, a family waiting area was also constructed and includes a donor wall recognizing all supporters who gave \$10,000 or more to this project.

With COVID-19 precautions in mind, small donor groups have been slowly coming in to see the funded space for themselves including Carlee Fraser, of Fraser Auto Group. "After losing a cherished member of our team to cancer, we were inspired to help ensure we have advanced health care, close to home. When dealerships throughout Durham Region came together to support the new Interventional Radiology suite, we knew our family's dealerships had to be involved. We were thrilled to tour the new suite and see the amazing equipment and technology in person. We were beyond impressed with the complexity of procedures being performed, and the impact the suite will have on the overall health of this community."

Thank You

A grateful patient recently acknowledged his therapy team by funding a lift device in the Stroke Unit.

A new ice machine was purchased for the Emergency Department to help patients and staff thanks to the generosity of a special donor in 2021.

Thanks to your support, the Medicine Program received two new bladder scanners to help provide more comfort, achieve better outcomes and improve quality of living for our patients.

Gift of Great Health Care For Future Generations

Donors looking to make an impact now, and in the future, have generously set up an Endowment Fund with Lakeridge Health Foundation with a donation of \$25,000 or more. These funds are invested through the Foundation in perpetuity, providing a reliable and ongoing commitment to various areas of Lakeridge Health. Endowment Funds are a deeply personal and impactful way to address both the immediate and long-term needs of our Hospital.
